

Dear sirs.. This Hr4026 Bill sounds a bit like a ploy from big FM radio networks to get XM radio to stop a service. Its kinda funny that it comes to this when the big FM stations cant even supply the same kinda service. even if they tried they can't do it. The way the Traffic is done now by FM radio is to sparatic and has more junk in the broadcast that we dont need as Truck drivers. We depend on the service we pay for. we can now get the reports in advance of going into a City and takin proper action if needed such as roads closed or accidents or just plain backups. Please help us keep the SERVICE WE PAY FOR!!Thank you for your time Sharon Carlock..
